

expertus
une société d'IBM

Cybersecurity Analyst

In the current context of the COVID-19 pandemic, Expertus continues to grow and our team is growing day by day. We have put in place many measures to ensure the efficiency of our staffing process and our plan for integrating new employees in virtual mode (we deliver all the necessary equipment for teleworking).

Department : Security information

Type of employment : Permanent, Full-Time

Manager : Information Security analyst

Work Address : 4, Place Ville-Marie, Suite 400 (Telecommuting during COVID-19)

Expected start date : From May 3

Position overview

Expertus is a Montreal Fintech established in 2001. It specializes in publishing payment and cash management software. Our solutions allow businesses and financial institutions to modernize payment processing and reduce their operational costs. More than 1,000 entities and 50 financial institutions around the world process an average of \$ 25 billion per day through our infrastructures.

Expertus is looking for a **Cybersecurity Analyst** who will actively contribute to cybersecurity activities and projects. The successful candidate will be responsible for developing and refining cyber security threat and incident response practices.

Main responsibilities

- Assist in the implementation and administration of corporate cybersecurity projects, programs and activities to achieve a strategic cybersecurity roadmap.
- Develop and document policies, protocols and procedures that promote computer system security and protect company data;
- Communicate with the various teams of the company to contribute to the various internal and external audits
- Scan, analyze and document vulnerabilities and document assessment results and recommendations to facilitate remediation tasks for other operational teams

expertus

une société d'IBM
